

CLAIMS

What is claimed is:

1. A shoe rack, for hanging on an upright surface, said shoe rack comprising:
first and second opposed side frame members, each said side frame member having a main body section and a plurality of support arms projecting outwardly therefrom, wherein each support arm has opposite ends and at least one tab extending upwardly therefrom at a location between said opposite ends thereof; and
a plurality of shoe retaining bars extending between said side frame members, wherein said tabs provide a barrier against lateral movement of shoes positioned on said shoe rack.
